Editing an Existing Scheduled Report Task Creates a Duplicate Scheduled Report Task

Versions Affected

ETM® System v7.1.x

Issue

If you open an existing scheduled report task and edit it, when you save the task, a duplicate scheduled report task is created containing your changes. The changes may or may not be present in the original copy. Both of these report tasks run at the scheduled time.

Workaround

To work around this issue

1. Close and reopen the **Scheduled Reports Tool**.
2. Delete the original report task, since it may not contain your changes and the newly created duplicate does.
